

PASCAL
MUELLER
Automated Urban
Design

in conversation with

Fabio
Gramazio

In the year 1963, Alexander wrote that “most of the difficulties of design are not of the computable sort”. Today, almost six decades later, we arrived in the age of urban computing, social media and machine learning. So, does Alexander's statement still hold true now? In this talk, we present systems for computer-aided urban planning and critically discuss the (societal) implications of these technologies.
